To Whom It May Concern

Re: Plastic Recycle Project, Worksop
Ron Hull Demolition Ltd.

Ron Hull Demolition Ltd., were employed as the Principal Contractor for the Demolition, Site Clearance and remediation of the former Ardagh Glass production facility in Worksop, UK.

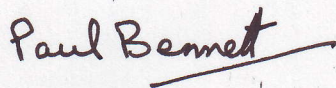

The works required the demolition numerous buildings and RC structures across the 14 acre site; demolition (using explosive methods) of a 200 feet chimney stack adjacent to a highly trafficked rail line; removal of a 200 tonne glass furnace and associated contaminants; safe removal of significant amounts of reportable asbestos materials; clean up areas of TPH contamination; landscaping of the cleared areas.

The contract was undertaken under the NEC form of contract and had a value of between £0.75 - £1.0M, and was completed 1 week ahead of the Completion date.

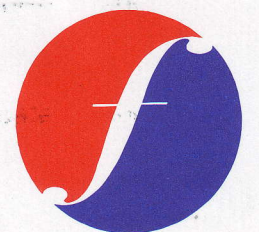

The works were executed to a high standard, Health and Safety management and methods were more than satisfactory, especially when the nature and awkwardness of some work activities is considered.

We would have no objection to employing Ron Hull Demolition Ltd., on any of our future projects.

Yours Sincerely

Paul Bennett
Construction Manager
